

# *NewAg Juniper*

*Juniperus Occidentalis ~ Western Juniper*

## *The Organic Solution*

### **Different Grades For Different Uses**

- “ALL-HEART”      100% Heartwood for maximum durability. (Special Order Only)  
(Full sawn & Sized – Band saw +/- 1/16”)  
All heart, No wane.
- “PREMIUM”      70%+ Heartwood for in-ground use.  
(Full Sawn Rough - Sized – Band saw +/- 1/16”)  
This grade was developed specifically to offer the best price without losing the in-ground heartwood durability. Since trees have a natural taper, one end of the product will be all heartwood, while the other end will have some sapwood. The all heart end goes into the ground. Light wane is allowed on an occasional piece.
- “LANDSCAPE”      No Heartwood Specifications.  
(Full Sawn Rough – Circular saw +/- 1/2”)  
This is a millrun grade with no prior selection. An affordable option for all your above ground landscaping needs. An eco-friendly substitute for used railroad ties. Wane is allowed on one or two edges.
